Python latest Version installed

The screenshot displays a Windows desktop environment. The primary focus is the 'IDLE Shell 3.10.6' application window, which is open and shows the Python 3.10.6 shell interface. The window's title bar includes standard minimize, maximize, and close buttons. The menu bar contains 'File', 'Edit', 'Shell', 'Debug', 'Options', 'Window', and 'Help'. The main text area of the shell displays the following text: 'Python 3.10.6 (tags/v3.10.6:9c7b4bd, Aug 1 2022, 21:53:49) [MSC v.1932 64 bit (AMD64)] on win32', followed by 'Type "help", "copyright", "credits" or "license()" for more information.' Below this, the prompt '>>>' is shown, and the user has entered '7-9' and '-2' on separate lines, with the cursor positioned at the start of a new line. The Windows taskbar is visible at the bottom of the screen, featuring a search bar on the left with the placeholder text 'Type here to search'. To the right of the search bar is a series of application icons, including the Start button, File Explorer, Microsoft Word, PowerPoint, Google Chrome, and several instances of the Microsoft Edge browser. On the far right of the taskbar, the system tray shows the current temperature as '30°C', the time as '16:59', and the date as '15-11-2022'. The taskbar also indicates the current language is 'ENG' and shows the battery level.

```
Python 3.10.6 (tags/v3.10.6:9c7b4bd, Aug 1 2022, 21:53:49) [MSC v.1932 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
